Keep Your Campus Safe with Streamlined Check-in and Check-out Processes

Staff and Student Barcode and RFID Scanners save time and enhance safety on every campus using Navigate360's Visitor and Volunteer Management System.

Improved Self-Serve Workflow and Security

Barcode and RFID scanning provides quick, secure check-ins for staff and students. Now all campuses equipped with VMS can enable staff with no-touch check in/out, and students to check in late or check out early with a scan of their school ID.

Streamlined Onboarding and Access Control

With the option to invite staff individually or in bulk and the ability to easily update staff profiles with barcode and RFID details, schools can easily set up this secure entry and exit process. Potential security risks are minimized without administrative burden.

Simplified Timesheet Management

This new functionality works with staff and student reporting to make VMS a powerful tool for managing staff timesheets. Improve your school's check-in and timesheet tracking with a single enhancement.

Enable Your Staff with the Modern Solution to Safety and Efficiency

Navigate360's Staff and Student Barcode and RFID Scanners make it simple for schools to improve security processes without sacrificing student and staff safety.

Make staff and student check-ins and check-outs faster, including touchless ID scanning for staff.

Empower students to check-in and check-out on their own, while maintaining front office approval that ensures campus security.

Combine secure, self-service workflows with accurate record-keeping to reduce administrative burdens.

Navigate360, a School Safety Partner You Can Trust

Every child deserves to experience the school day without fear, and that starts with maintaining a secure campus. Navigate360's Visitor Management System, now enhanced with Staff and Student Barcode and RFID Scanners, is the modern solution to managing the check-in/check-out process without increasing front office workload.

Your satisfaction is our top priority, these upgrades reflect our commitment to delivering the best possible experience. Contact us today to learn more about how making the switch to our Visitor Management System can elevate campus security and optimize the efficiency of your security procedures.
